## **Career Objective**

Self motivated and hardworking fresher seeking for an opportunity to work in a challenging environment to prove my skills and utilise my knowledge and intelligence in growth of the organisations.

---

## **Experiences**

**University Faculty — Full stack Web Dev Intern**

June 2021 - January 2022      Worked as a Full Stack Developer under our university faculty to develop a placement portal.

**Marmag Infra pvt.Ltd — Full Stack Web Dev Intern**

June 2021- August 2021      Worked as a Full Stack Developer to develop a webpage Using Php, Mysql, Html, Css.

---

## **Projects**

**Hiring website for company [HTML, CSS, Php, Mysql] — [\[GITHUB\]](#)**

- Built a professional website for a marmag company. This is a live project.
- This website mainly consists of three phases:  
Admin, Recruiter, Applicant (User).
- Admin deals with all the activities like which company hired the particular person.
- Recruiter deals with hiring the people based on his skills and experience.
- User is the main role where the user uploads all the required documents to place into a company.

- Lead the team to complete the project.
- Updated the work to the client by giving a ppt presentation every weekend.

### **Placement portal[HTML,CSS,Bootstrap,Javascript,PHP,Mysql] — [\[LIVE\]](#) [\[GITHUB\]](#)**

- Built a website for campus placements .It is a live project using by students(more than 2000),mentors(Teachers of our college),senior management(like Vice Chancellor,HODs,Placements head,etc.)
- It includes a Highcharts api where we convert data from sql to json format and json to charts like bar graph,pie chart.
- Created a mailing system where a mentor can send mail to all his students at once by selecting the names.
- Provided a feature for the admin where admin can edit all the details of students, visiting company and test details.

### **Apk Downloader[HTML,CSS,Javascript,Django]**

- Developed a website where there will be all apk files and the user can search the app he wants and also he can filter the apps and games and download them.
  - This app is developed using the django framework and deployed using python everywhere services.
-
